**Science Applications<sup>3</sup>**

(one of the below classes)

Classes in this category must be at the 200-level or above, consist primarily of natural science, and not be integrative studies courses. Students should check with the STEPPS Coordinator to ensure that the particular course they choose will adequately fulfill this category

**Capstone Course**

MC 300 \_\_\_\_\_<sup>4</sup> or LBS 492 \_\_\_\_\_<sup>5</sup>

<sup>1</sup> A student may petition the Coordinator of STEPPS to allow for any class not on this list to be substituted for one that is. In these cases the final decision is left to the Coordinator, and students should always seek approval before enrolling in the class.

<sup>2</sup> The project done in completion of MC 399 or MC 490H must be relevant to STEPPS and conducted under the guidance of a STEPPS faculty member. Students should therefore seek approval from the STEPPS Coordinator before enrolling.

<sup>3</sup> At least two of the four courses in the Public Policy, the Science Applications, or the History, Philosophy and Sociology of Science requirements must be taken outside of the student's major department.

<sup>4</sup> The only MC 300 that will fulfill the Capstone Course requirement is MC 300: STEPPS Capstone Course.

<sup>5</sup> Only LBS 492 courses that contain significant science policy content will be accepted to fulfill the Capstone Course requirement. Students should therefore seek approval from the STEPPS Coordinator before enrolling.
