INTERNATIONAL RELATIONS

Madison's major in International Relations trains students to think imaginatively, and in depth, about the problems of world society and about the opportunities for solving them. By design, it is a sophisticated program: its graduates have gone on to careers in the foreign service, politics, international organizations, academics, law (including international law), public relations, lobbying, economic development work, intelligence gathering and analysis, the news media, and international business. It is also, of course, an excellent preparation for law school and for graduate study in international affairs or international business.

The outstanding features of the curriculum are its breadth and depth. It is organized around the following themes: international security and conflict resolution; international political economy; global governance; foreign policy of the United States and other countries; and comparative, regional and cultural studies.

The International Relations curriculum encourages students to think creatively about a variety of issues: What constitutes "national security"? What are the social consequences of modernization? What are the causes and likely consequences of ethno-nationalism? How does the U.S. arrive at foreign policy decisions? How is that different from how foreign policies are made in other countries and which is better? What is the impact of protectionist foreign trade policies? How do national, regional and international political, social, and economic actors interact in the transition to a post-Cold War global order? What is the impact of the U.N. and other international organizations? What effects do weapons and communications technologies have on world politics? By what means have national defense policies been implemented since the end of World War II? Some classes will use case studies in which students will be examining real or hypothetical foreign policy dilemmas and developing solutions to them. Others will evidence the importance of theories and models for comprehending and influencing world events.

Examples of International Relations Senior Seminars (MC 492)

<u>Political Economy and New Capitalism -</u> Capitalism and economic theory have been challenged as a result of recent economic and financial crises. Citizens of a number of countries, particularly in Latin America and in the euro zone, have replaced or considered replacing governments embracing capitalism with those promoting socialism. What are the limits of capitalism? What is the role of government in modern capitalist economies? Are the new challenges that have arisen minor or fundamental? This course aims to capture this debate, drawing on a variety of fields, cases, and sources. In addition to the United States, examples may include Brazil, Britain, China, Greece, India, Indonesia, Russia, and South Africa. In addition to the economic dimensions of crises, the political and social dimensions of crises will also be a focus of the course, especially in drawing comparisons to the Great Depression and other periods of economic crisis.

<u>U.S. National Security: Strategy, Process, and Policy -</u> This seminar will focus on the development and application of U.S. national security policy. It will consider the continuities and changes that have occurred based on the evolution of the United States' capabilities, interests, and position in a world that has changed dramatically over the last 200 years. We will examine the changes that have occurred since the end of the Cold War and after 9/11 in light of earlier patterns of behavior. We will also examine how America's national security institutional infrastructure has been adapted over time to meet new conceptions of threat. Throughout the course, we will focus on the interaction between the development of strategic visions, the development and execution of policy options, and the process of national security policy making.

<u>Global Poverty and Inequality -</u> This seminar explores the issue of global poverty and inequality, with a focus on the role of foreign aid and development assistance. What is poverty? What is inequality? What is the relationship between poverty and inequality? What are the sources of global poverty and inequality? Can foreign aid reduce poverty? What role do international organizations play in dealing with global poverty and inequality?

We begin with a critical analysis of the concepts of poverty and inequality as well as different theoretical approaches for explaining their causes. We examine the major debates that surround the effectiveness of foreign aid in alleviating poverty. We then focus on critically assessing the role of a variety of international actors, including major international organizations (U.N., World Bank, regional development banks) as well as bilateral donors (USAID), large NGOs and foundations (Save the Children, Bill & Melinda Gates Foundation), in addressing poverty around the globe. We also explore the impact of new donors, such as China, on the global aid regime.

<u>Water, Energy & Commerce: Resource Scarcity, Sustainability & Environmental Impacts -</u> This seminar will examine comparatively the experience of states undergoing rapid economic, political, social and environmental change since the collapse of the Soviet Union. It provides an interdisciplinary analysis of the progress made and challenges faced in post-socialist era Europe, Russia, and the Eurasian successor republics to the former Soviet Union with a focus on sustainable development. It will examine the philosophical debates underlying international trade and business trends and policy, economic development and reform efforts, and the evolution of political and economic institutions. It will also examine the feasibility of alternative policy strategies in a changing and increasingly interdependent global economy. An important focus will be on the comparative analysis of natural resource challenges and conflicts, particularly as they relate to the energy-water nexus in Eurasia.

INTERNATIONAL RELATIONS

This is a checklist for students in the International Relations major who began in IR Fall 2018 or after. Transfer students who are still taking courses at other institutions should choose classes that may be applied toward MSU's Integrative Studies requirements, such as MSU's math requirement, if necessary, or Madison's second language and economics requirements.
