¹ A student may petition the Coordinator of STEPPS to allow for any class not on this list to be substituted for one that is. In these cases the final decision is left to the Coordinator, and students should always seek approval before enrolling in the class.

² Only LBS 492 courses that contain significant science policy content will be accepted to fulfill the Capstone Course requirement. Students should therefore seek approval from the STEPPS Coordinator before enrolling.

³ The project done in completion of MC 399 or MC 490H must be relevant to STEPPS and conducted under the guidance of a STEPPS faculty member. Students should therefore seek approval from the STEPPS Coordinator before enrolling.

⁴ At least two of the four courses in the Public Policy, the Science Applications, or the History, Philosophy and Sociology of Science requirements must be taken outside of the student's major department.
